

# REGENDRUPPELS TELLEN MET PYTHON: IOT PLUVIOMETER PROJECT

**Jelle Victor - Fri3d camp 2024**

# WAAROM TOCH OOK?

- Kunnen vragen aan je buur hoeveel liter hij heeft gehad.
- Ken jezelf. Notoir slecht in een pluviometer dagelijks checken.
- Interesse in elektronica
- data logging op lange termijn
- Veel follow up projecten mogelijk!

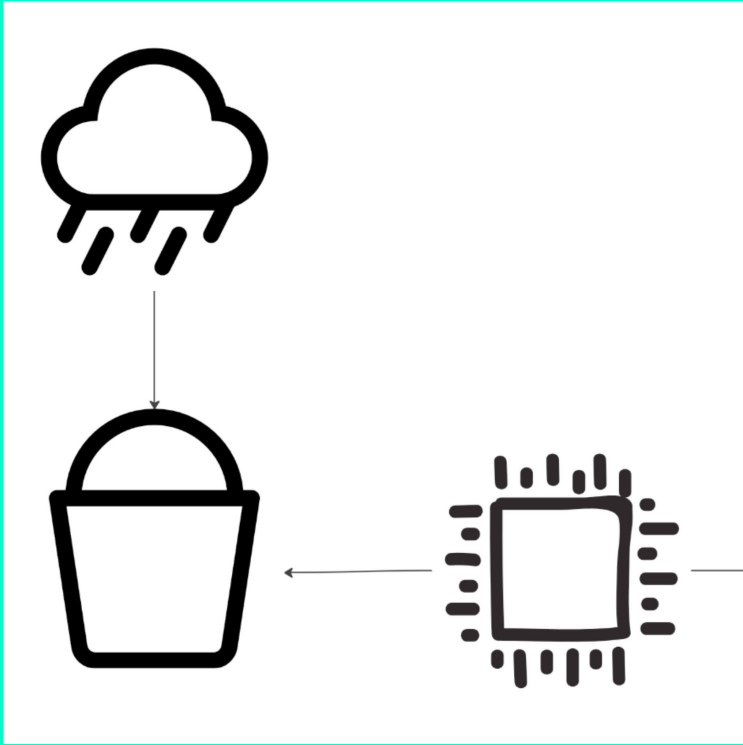

# ELEKTRONICA + 3D PRINTING + WEERS INFO

- Haalbaar elektronica project
- Raspberry pi pico werkt op micropython
- Integratie in Home Assistant

HOOFDSTUK 1:  
DRUPPELS TELLEN

# BOM (BILL OF MATERIALS)

- raspberry pi pico w (w for wifi)
  - microcontroller, hart van het toestel
  - ondersteunt micropython

# BOM - REED CONTACT & MAGNEET

# BOM - 3D PRINTS

# BOM - 3D PRINTS

- h

# HOOFDSTUK 1.1: 3D PRINTING

# 3D MODEL

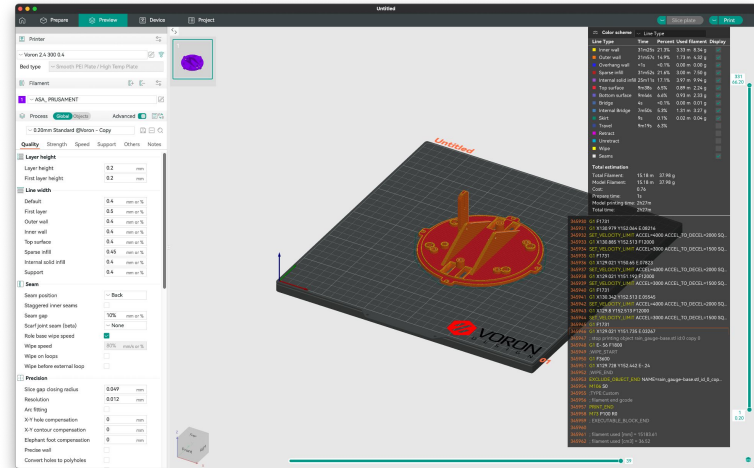

- Veel modellen beschikbaar
- 3d printing friendly model
- model ge-remixed
  - andere magneet
  - threaded inserts

# PRINTERINSTELLINGEN

Materiaal keuze: ASA (Prusament - natural & Prusa Orange)

- 3 top layers
- 4 bottom layers
- layer height 0.2
- layer width 0.4
- 15% infill

# HOE NEERSLAG DETECTEREN

hiervoor kan je 2 manieren gebruiken.

- `while(true)` loop
  - simpele implementatie
  - kan op het missen van activering van de switch
- IRQ (Interrupt request)
  - op hardware wordt er een signaal gedetecteerd en dit stopt de CPU om een speciale handler methode uit te voeren
  - Dit is ondersteund op de RP2040 microcontroller van de PICO

# NEERSLAG METEN

```
number_of_times_bucket_tipped = 0

def tipped(pin):
    global number_of_times_bucket_tipped
    number_of_times_bucket_tipped += 1

rocker = Pin(15, Pin.IN, Pin.PULL_UP)
rocker.irq(tipped, trigger=Pin.IRQ_FALLING)
```

initiële staat van de teller

callback om het aantal bij te houden

de pin van het reed contact  
de irq registreren

## Protecting Your Instruments from Spiders, Wasps and Other Pests

When making measurements and carrying out experiments, scientists tend to spend a great deal of time and care in selecting the right instruments, calculating uncertainty, and making sure conditions are acceptable. One of the last things on the minds of most people (and rightfully so) is that a pest, like a spider, could find a way to sabotage an experiment or measurement campaign. As spring approaches, many pests (including our 8-legged friends) will just see the aperture of an infrared radiometer (IRR) as their new comfortable home. There are some simple steps to prevent IRRs from looking like the photo below.

### Spiders in Rain Gauge

**Post Reply**     

#### Spiders in Rain Gauge

by **fcook36** » Tue 13 May 2014 4:00 am

Any ideas on how to keep spider nests out of the rain gauge?

Floyd
